The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 62-003758 in view of JP 57138359 and Mohlenkamp, Jr. et al.

JP 62-003758 discloses a seasoning composition comprising potassium, a glutamic acid, and a sugar alcohol (see corresponding abstract).

The claims differ as to the use of inosinic acid and sucrose.

JP 57138359 discloses a salting agent comprising potassium chloride, sodium 5-inosinate, and sodium glutamate (see abstract).

Mohlenkamp, Jr. et al disclose a salt substitute comprising inosinic acid and sucrose (see entire patent, especially column 3, lines 53-63 and column 4, lines 57-68).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use inosinic acid and sucrose in that of JP 62-003758 because the use of inosinic acid and sucrose in flavor products is conventional in the art.

In the absence of a showing to the contrary, the claimed amounts are seen to be no more than a matter of choice and well-within the skill of the art. At most, the amounts are seen to be no more than optimization, see *In re Boesch* 205 USPQ 215.

All of Applicant's components are taught by the prior art and Applicant uses the components for their art-recognized function. It is not seen where Applicant has provided a showing of unexpected results.

Attention is invited to In re Levin, 84 USPQ 232 and the cases cited therein, which are considered in point in the fact situation of the instant case, and wherein the Court stated on page 234 as follows:

This court has taken the position that new recipes or formulas for cooking food which involve the addition or elimination of common ingredients, or for treating them in ways which differ from the former practice, do not amount to invention, merely because it is not disclosed that, in the constantly developing art of preparing food, no one else ever did the particular thing upon which the applicant asserts his right to a patent. In all such cases, there is nothing patentable unless the applicant by a proper showing further establishes a coaction or cooperative relationship between the selected ingredients which produces a new, unexpected, and useful function. In re Benjamin D. White, 17 C.C.P.A. (Patents) 956, 39 F.2d 974, 5 USPQ 267; In re Mason et al., 33 C.C.P.A. (Patents) 1144, 156 F.2d 189, 70 USPQ 221.
